

PXIL MD & CEO Participates in Power Gen 2024: Future of Energy Markets

New Delhi, 6th Sept 2024

Today, the MD & CEO, Power Exchange India Limited (PXIL) participated as a distinguished panelist in a high-profile discussion titled "*Evolving Currents: Navigating the Dynamics of Tomorrow's Electricity Markets*". The event was held at the prestigious Yashobhoomi Convention Center, New Delhi, and organized by Power Gen India, one of the foremost platforms for the power generation and energy sector. The session was moderated by industry veteran Mr. S.K. Sonnee and brought together key leaders from across the energy spectrum.

The panel provided critical insights into the rapidly evolving electricity markets, exploring emerging challenges and new opportunities in the energy sector. Discussions ranged from advancements in market mechanisms and the growing importance of digitization to the impact of evolving regulatory frameworks on market structures.

A key highlight of the session was the role of renewable energy integration. As global markets pivot toward sustainable energy sources, the panel delved into the potential for solar, wind, and other green energies to transform traditional electricity markets. The conversations also focused on how market innovations and strategic approaches can bridge the gap between current infrastructure and the green energy demands of tomorrow.

The MD & CEO of PXIL emphasized the organization's commitment to driving innovation in the energy markets, particularly through the introduction of new market instruments and mechanisms. He noted, *"PXIL is at the forefront of delivering sustainable market solutions, offering platforms that are critical to ensuring a smooth transition toward cleaner, more efficient energy systems."* Shri Ganguly also emphasized the need of immediate implementation of Market Coupling for better liquidity.

The event underscored PXIL's strategic vision to shape the future of electricity markets by leveraging cutting-edge technologies and innovative market solutions to address the growing complexity of the sector.
